

Health and Safety Specialist

Sullivan International Group, Inc. is a nationally-recognized consulting firm that provides environmental engineering, construction management, and science and technology products and services. We are currently looking for a Health and Safety Specialist. The position will be located in our San Diego office.

Position Summary

Primary responsibility of the Health & safety Specialist is to support operations by performing health and safety duties at hazardous waste operations and general construction projects according to contract specifications, and regulatory and company requirements, and by providing health and safety services to project managers and other project personnel, at various locations nationwide.

Key duties include; acting as Site Safety and Health Officer (SSHO) in field projects, supporting the implementation of the corporate health and safety program at project sites; performing health and safety site inspections, self-assessments, and audits at project sites; identifying site-specific hazards and developing proper controls; preparing or reviewing Site Health and Safety Plans, Accident Prevention Plans, Activity Hazard Analyses, Air Monitoring Plans, Safe Work Practices, and other related project health and safety documents; assisting in incident investigations, reports, and corrective actions; developing and delivering safety training, and managing databases of project health and safety activities. These duties will occur at numerous site locations nationwide.

Essential Skills/Experience/Education:

- B.S. in science, engineering, industrial hygiene, safety or environmental disciplines
- 5 years of actual field experience as a site safety officer in environmental remediation, emergency response/hazmat, environmental investigation sites, or civil construction, preferably for the US Army Corps of Engineers (USACE), U.S. Navy, USAF or U.S. EPA.
- 3 to 5 years of experience in implementing health and safety on projects, including: developing and reviewing site-specific health and safety plans and procedures for government agencies, such as USACE, U.S. Navy, USAF and U.S.EPA.
- Demonstrated broad-based experience in environmental and health and safety conditions and situations, including; job hazard assessments, personal protection equipment, heat/cold stress, first aid, confined space entry, fall protection, air monitoring, hazmat response, asbestos & lead abatement, radiation safety, personnel and equipment decontamination, fire and explosion, lock out-tag out, hazardous waste operations, and emergency control.
- Experience and proficiency in the selection, usage, and maintenance of safety equipment and instrumentation.
- Working knowledge of health and safety hazards associated with various environmental and construction-related activities such as working around heavy machinery, excavation & trenching, electrical & mechanical systems, tools, crane rigging/lifting, heat stress. Confined spaces, elevated work, hazardous and toxic contaminants, flammable and combustible materials, demolitions, hot work, etc.
- Working knowledge of current health and safety standards, including OSHA general industry and construction standards, US Army Corps of Engineers EM-385-1-1 Safety and Health Requirements Manual, and US EPA site assessment and remediation guidelines.
- Experience and proficiency in writing and preparing site safety plans, activity hazard analysis, air monitoring plans, standard operating procedures, and other written documents that maybe required for project safety.
- Demonstrated capability to interface and maintain effective relationships in a team oriented environment.
- Excellent writing skills, and experience developing and preparing technical documents and plans, in particular Health and Safety deliverables.

- Proficiency with Microsoft Office Programs especially Word, Outlook, Excel, PowerPoint, and SharePoint. Other office program knowledge helpful.
- Solid working knowledge of website tools, and online informational resources in the areas of health and safety and regulatory compliance.

Certifications:

- 40-hour HAZWOPER training certificate highly desirable
- Current 8-hour HAZWOPER refresher desirable.
- EM-385-1-1, 40-hour Construction Safety Training Certificate, or 30-hour OSHA Construction
- Radiation Safety Awareness desirable.
- Current first aid and CPR training certification is desirable

Work Requirements:

1. 50% Travel required
2. Office and field environments in construction or regulated access sites.
3. May be required to work before or after normal company operating hours [8:00 a.m. to 5:00 p.m] and weekends in response to project needs or emergencies.
